

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

per cent offering by students of that subject. The 20 per cent offering of units in mathematics in response to prescriptions and recommendations amounting to 18 per cent, is even more puzzling. The extraordinary offering of 14.4 per cent of Latin in response to prescriptions and recommendations of 11.6 per cent, is clearly due to the situation of other foreign languages. In spite of a recommendation of 4.9 per cent, but .1 per cent of Greek was offered. The recommendation of 5.7 per cent of German was met by an offering of .47 per cent. The idea that Spanish would take the place of German is indicated by a 5.3 per cent recommendation, but is not confirmed by the offering of only 1.4 per cent. Only the recommendation in French, 6 per cent, is approached by the offering, 4.9 per cent. *Plainly Latin is still the foreign language of southern secondary schools!*

### AMERICAN SCHOOL OF CLASSICAL STUDIES AT ATHENS

Every reader of THE CLASSICAL WEEKLY ought to be profoundly interested in the number of Art and Archaeology for October, 1922 (Volume XIV, No. 4, pages 171-260). This contains an account of The American School of Classical Studies at Athens: Foundation, Organization, and Work of the School (three illustrations), 171-183; Excavations of Classic Sites (nine illustrations), 184-192; The Excavations at Corinth (twenty-one illustrations), 193-225; Excavations of Pre-Hellenic Sites (five illustrations), 226-232; Researches on the Athenian Acropolis (six illustrations), 233-245; The Publications of the School, 246-250; The Opportunities of the School in the Byzantine Field (four illustrations), 250-256; The Excavations at Colophon (three illustrations), 256-260.

In a Prefatory Note, Professor H. N. Fowler, of Western Reserve University, explains that he has edited and, in part, written this number of Art and Archaeology. He makes very careful acknowledgement of his indebtedness to other scholars, past and present, in the preparation of this article (Dr. B. D. Hill, Dr. Carl W. Blegen, Dr. Robert P. Blake, and Professors Seymour, Capps, Chase, and Dinsmoor).

In his work on this number of Art and Archaeology, Professor Fowler has rendered most important service to The American School of Classical Studies at Athens, and to every American who is, or ought to be, interested in the history of the School, and in its work, past, present, and prospective. Hereafter, no one will have any excuse for being ignorant concerning this School.

### CLASSICAL CLUB OF GREATER BOSTON

The fourth annual luncheon of the Classical Club of Greater Boston was held at the Museum of Fine Arts, Huntington Avenue, on Saturday, October 21. Miss Alice Van V. Brown, of the Art Department of Wellesley College, discussed Present Conditions on

the Adriatic, and Mr. Hawes, of the Museum, who during the past summer visited Austria, spoke upon the conditions in that country.

Rev. Willard Reid, former President of the Club, who during the past summer was in Rome, touched upon the interesting discoveries recently made in the Holy City in excavating for the Church of San Sebastian. Sixty steps below the present level, graves were found plainly marked with the names of the Apostles Peter and John.

Professor Alexander H. Rice, of Boston University, President of the Club, was reelected together with the other officers, with the exception of the Treasurer, Mr. Thornton Jenkins, Head Master of the Malden High School, who was compelled to resign on account of the pressure of other duties. Mr. Frank A. Kennedy, Head of the Department of Latin and German in the Girls' High School, was elected in his place.

ALBERT S. PERKINS, *Censor*.

### PALAEOGRAPHIA LATINA A NEW PERIODICAL

Professor W. M. Lindsay, well known as editor of texts of Isidorus, Martial, and Plautus, in the Oxford Classical Text Series, and as author of the monumental work *The Latin Language*, and, in more recent years, of works in the field of palaeography (witness e. g. his *Notae Latinae*, reviewed by Professor Charles Upson Clark, in THE CLASSICAL WEEKLY 11. 189-190), has begun the publication of a journal of palaeography, to be known as *Palaeographia Latina*. It will deal particularly, according to the Preface of the first number, with Latin bookscript until the middle of the eleventh century. In this new venture Professor Lindsay has the help of Dr. M. R. James, Provost of Eton College, and Dr. J. Cunningham, a member of the St. Andrews University Court. The Preface states also that the journal will be "cosmopolitan. Articles in French, Italian, German will be as welcome as those in English". Original articles, as well as books or articles for review, should be sent to Professor Wallace M. Lindsay, The University, St. Andrews, Scotland. The senders are requested also to write in the corner of the envelope the words *Palaeographia Latina*. Professor Lindsay hopes that two parts will appear each year. The publisher is the Oxford University Press, American Branch. The price of the present first part is \$1.75.

This first number contains two articles: *The Letters in Early Latin Minuscule* (till c. 850), W. M. Lindsay (7-61); *Some Early Scripts of the Corbie Scriptorium*, by the late Abbé Paul Liebaert (62-66).

The five Plates deal with the following matters: I. Latin Letters; II, The Corbie En-script; III, The Corbie Leutchar-script; IV, The Corbie Maudramnus-script; V, The Corbie Maudramnus-script.
